Embedded Images and Merged Headers

1 Embedded image

The bar chart below is an embedded raster image, not native PDF vector graphics. Its values are invented only to test extraction and are not product measurements.

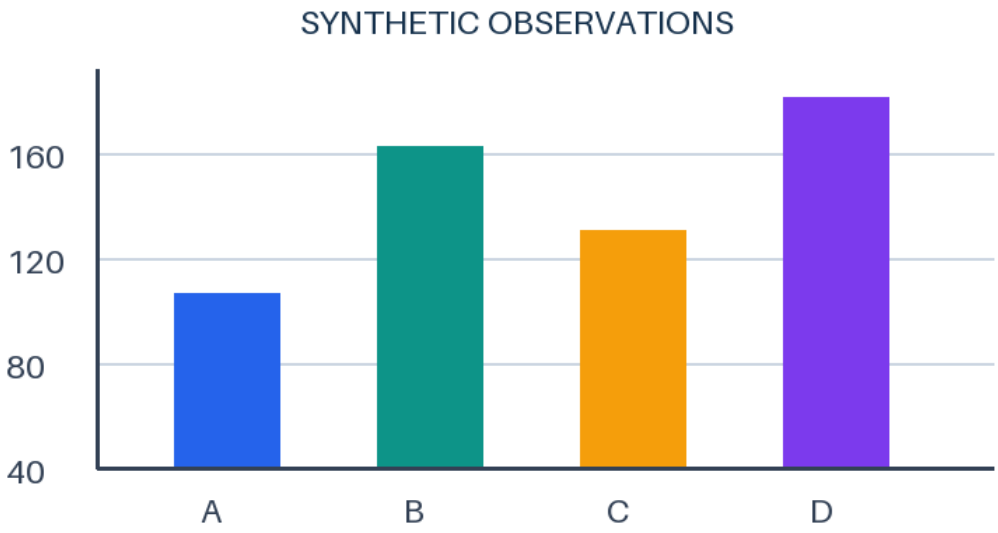

Figure 1: Embedded raster chart containing four synthetic observations.

2 Merged table headers

Table 1 has a column group and a row-spanning first header cell. No recognition benchmark results are represented by these invented counts.

Table 1: Synthetic counts with merged row and column headers.

Method	Counts	
	Train	Test
Method A	120	30
Method B	140	35
Method C	160	40
